

TUTORIAL Check-List Manager

First of all, let's explain what is a checklist :

A checklist is a list of questions (here called lines) grouped in categories (for example by theme).

There are 2 type of lines : Choice and Text. The answer for a choice question may be Valid/Na/Default. You may answer a little text to reply a text question.

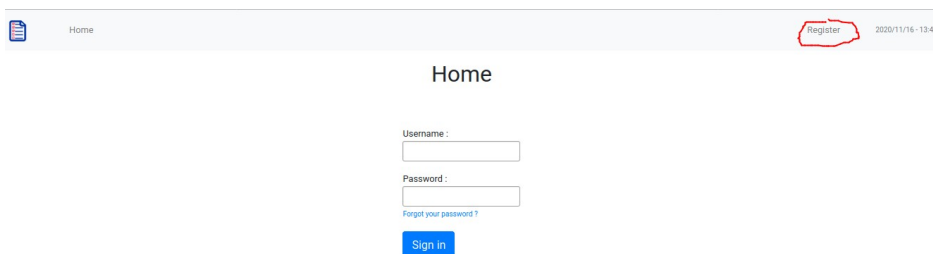

You may add remarks (Why the default is notified for example).

At the end you may validate or not the checklist, add photos (5 max) to illustrate or explain your answers.

The check-list is backed up as a pdf file that you will be able to retrieve, consult or print later.

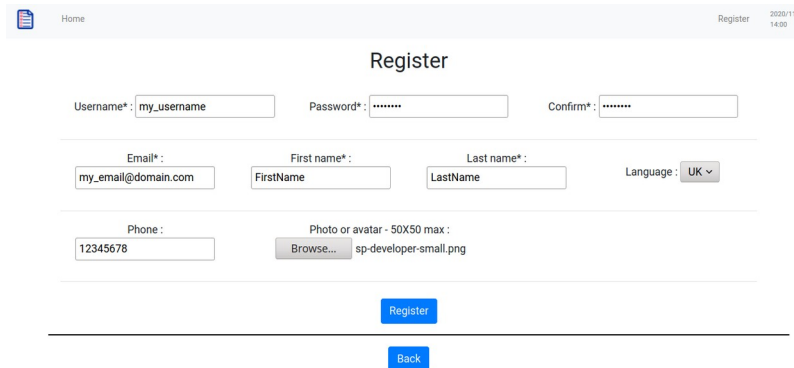

Enjoy !

To go further, you have to register yourself

The screenshot shows the 'Home' page of the application. At the top, there is a navigation bar with a 'Home' link and a 'Register' link (highlighted with a red circle). Below the navigation bar, the page title is 'Home'. The main content area contains a login form with fields for 'Username' and 'Password', a 'Forgot your password?' link, and a 'Sign In' button.

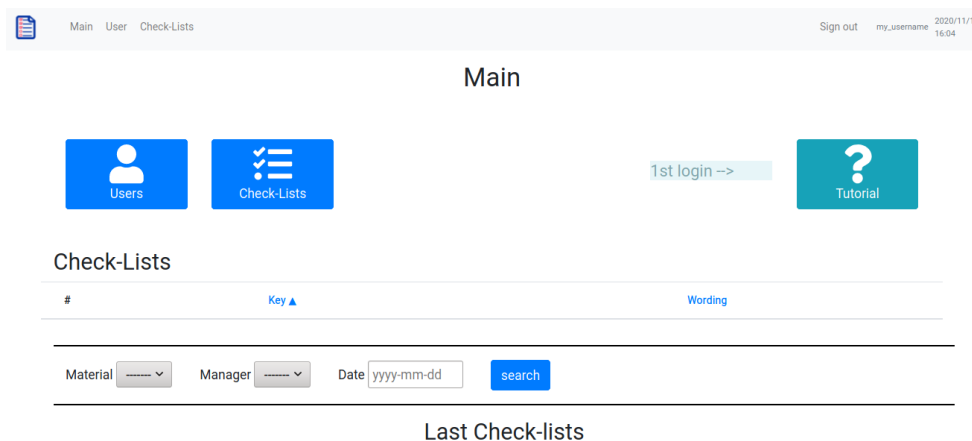

Then fill all the necessary fields in the register form and click on register

The screenshot shows the 'Register' page of the application. At the top, there is a navigation bar with a 'Home' link and a 'Register' link. Below the navigation bar, the page title is 'Register'. The main content area contains a registration form with fields for 'Username*', 'Password*', 'Confirm*', 'Email*', 'First name*', 'Last name*', 'Language' (dropdown), 'Phone', and 'Photo or avatar - 50X50 max :'. There is a 'Browse...' button for the photo field. At the bottom, there is a 'Register' button and a 'Back' button.

You can now log-in with your username/password.

Let's describe the main page :

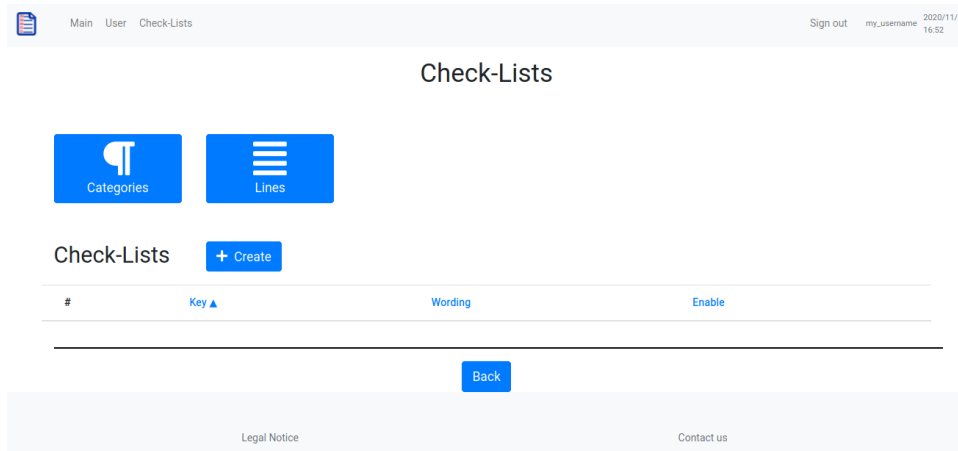

The navbar and buttons:

- The main menu bring you to the main page (this one).
- The user menu and buttons is to go to the user page where you will be able to change your account details.
- The Checklist menu and button is the most important for you. There, you will be able to create categories, lines and checklists.

The 2 arrays :

In the Check-lists array you'll find the different check-lists you 've already created (now it's still empty but we will fill it)...
The Last Check-list array contains all the checklists already input.

Let's click on the check-lists button !

Always the same principle :

The main array will contain the created check-lists.

2 Buttons : Categories and Lines to go to the pages to create them.

Click on the Categories button.

Create Check-List

Key*: checklist1

Description*: Describe the Check-list here !

Enable*: ☒

Create

Categories

cat2 - Category2

Lines

line3 - The 3rd line - C

Check-List

Cat1 - Category 1

line1 - Line1 detail - C

line2 - line2 detail text r... - T

Enter the unique key for your check-list and describe it shortly.

In the box Categories and lines, you'll find respectively all the categories and lines you've already created and enabled.

The Check-List box is empty...

Fill the check-list by "dragging and dropping" the categories and lines from their boxes to the checklist box. You can also sort, remove categories and lines in the check-list.

Once everything is OK click on the Create button and return to the main page (Navbar).

PDF preview

Save

This page allow you to finalize the check-list by entering a unique key (a default key is proposed), validate it and input global remarks. You may also add some pictures (png/jpg) to illustrate your choices.

The Previous button bring you back without losing your inputs.

If you click on preview, you will see the PDF file pre-visualization (new window).

Page 1 of 1

Describe the Check-list here !

date : 16/11/2020

Category 1

Line1 detail :	Valid
line2 detail text response :	bla bla

Remarks

remarks

more

than on line

Category2

The 3rd line :	Default
----------------	---------

Remarks

Global remarks

globale remarks line1

globale remarks line 2...

Check-list is : VALID

Unique identifier : 1605544108.3915

Now you can see the the PDF file but let's save the PDF by clicking on the Save button.

You are now on the main page and can see your freshly save check-list. Its color is green because the checklist has been flagged as valid. Red color is for the non-valid check-lists.
